Nat Hab's Alaska Bear Camp

A Total Immersion with Brown Bears from Our Private Fly-In Wilderness Base

A genuine encounter with the Alaskan wilderness often starts with a bush plane. And this adventure begins with a private flight across Cook Inlet, passing active volcanoes and glaciers before landing on a pristine beach. The stretch of sand is empty, except for the brown bears that live here—we often see them ambling along the shore before we even land. Our sustainable bush camp provides a base for exploration in the bears' midst, fronting the bay on the site of an old homestead in a largely untouched setting. It's a peerless location: Bear Camp occupies an enclave of private land surrounded by Lake Clark National Park, one of the world's most renowned bear-viewing destinations. Against the backdrop of the ice-clad Aleutian Range, Nat Hab's Alaska Bear Camp offers rustic luxury and total solitude—with enough bear thrills for a lifetime and then some!

Trip Highlights

Alongside expert naturalist guides, watch bears from our private inholding within Lake Clark National Park, where they roam, fish and forage in view of camp

Reach our isolated Bear Camp on Cook Inlet via a scenic chartered bush plane flight from Homer, passing dramatic mountain ranges and glacier-iced volcanoes

Deluxe tent cabins ensure your comfort in the most remote of settings, while chef-prepared gourmet meals and enclosed gazebos with fire pits enhance your stay

Nat Hab's Alaska Bear Camp Itinerary

A Total Immersion with Brown Bears from Our Private Fly-In Wilderness Base

Day 1: Anchorage, Alaska / Private Flight to Homer

At the Anchorage airport, board our chartered group flight to Homer, where our Alaska Bear Camp adventure begins. This scenic fishing town of 5,500 on Kachemak Bay is located near the bottom of the Kenai Peninsula. Known as “the end of the road,” Homer is the most southerly point on Alaska’s contiguous highway system. Surrounded by 280 acres of protected state land, this critical wildlife habitat sustains more than 100 bird species and a large local moose population. Homer’s key geographic feature is the Homer Spit, a 4.5-mile-long gravel bar that extends into the bay. Visitors to the town harbor frequently see fishing boats unloading their catch—Homer is heralded as the Halibut Capital of the World. This evening, gather with our Expedition Leader for a welcome dinner and orientation to the incredible bear adventures that lie ahead.

Day 2: Kachemak Bay Private Cruise / Private Flight to Nat Hab's Alaska Bear Camp—Bear Viewing

Head out on a private boat cruise this morning to explore the abundant waters and magnificent scenery of Kachemak Bay. The bay is transformed daily by some of the largest tidal fluctuations in the world, and it's home not only to coveted sport fish but other plentiful marine life, too, with sea otters, seals, and sea lions being common sightings. A highlight of our cruise is the Gull Island seabird rookery, home to 10,000 nesting seabirds with a chance to view puffins, guillemots, kittiwakes, murres and more.

After lunch we fly by private chartered bush plane across Cook Inlet to Nat Hab's Alaska Bear Camp. Weather in this region is often fickle and unpredictable, so we are prepared to work with our pilot to determine the best window of opportunity and adapt our timing as needed. Once we're in the air, the view is staggering as we pass snow-clad volcanoes and jagged glaciers winding down from icefields on high. Our destination, where the Aleutian and Alaska ranges meet, is Lake Clark National Park, some of the world's most critical brown bear habitat. Look for bears along the shoreline as we come in for a landing, taxiing down the beach. Bear Camp is located on a historic homestead, a rare private inholding of coastal land surrounded by the roadless wilderness of Lake Clark National Park and Preserve. These 4 million protected acres are the ancestral homelands of the Dena'ina people, preserving an intact ecosystem at the headwaters of the largest sockeye salmon fishery in the world. Accessible only by plane or boat, Bear Camp is ours alone for an unparalleled immersion in pristine brown bear habitat.

Once we reach Bear Camp, we gather for an orientation and safety talk with coaching on bear etiquette, before heading out with our naturalist Expedition Leaders to meet the bears! Here at Bear Camp, we have some of the best, most consistent viewing anywhere in Alaska, due to the season-long availability of food. In the spring, sedge grass awaits the bears as they emerge from their dens, protein-rich food that supports rapid growth. Bears also dig clams from the beach as they await their late summer feast: by late July or early August, the region's salmon runs help provide the fat that enables the bears to survive a long winter. All season long, nature serves a steady bounty to these omnivores. And since the bears are sated by this abundance, they see us humans merely as part of the scenery, allowing us to move safely in their midst on guided outings, at times observing them from just a few yards away. Two viewing platforms, one elevated for a territorial view, enable us to see bears nearby and at a distance. And we often watch them right from camp, which is surrounded by electrified wires, ensuring our safety on site. After an exhilarating day, settle into your weatherproof tent cabin before we gather in the dining tent for dinner—you'll be surprised at the outstanding meals our resident chef is able to prepare in such a remote location. Fresh local fare is on the menu, including Alaskan salmon and other offerings from the region's seasonal abundance.

Discovering Our Planet Together

Days 3 & 4: Brown Bear Viewing in Lake Clark National Park

Prior to this rare opportunity, most of us will have seen bears only in zoos or nature documentaries. Yet there's nothing that comes close to this immersive experience, being among them in their wild home. Against a backdrop of sheer-sided peaks rising above the green valley floor, the bears are sometimes near enough that we can hear them chewing their food and communicating with one another in woofs, purrs and growls. Alaska's mighty brown bears—the coastal version of the interior grizzly bear (which is the same species, *Ursus arctos*)—are the largest land predators in North America. Adult males can weigh up to 1,500 pounds!

While bear activity will vary according to the season, weather conditions, and timing of the salmon runs, and we can never predict exactly what bear behavior we'll witness, there's always something riveting going on. Earlier in the season, we might see mating activity. Later on, we could catch a sighting of mothers with playful cubs. Once the salmon start running by mid- to late summer, we may see bears fishing in streams. And while bears are usually plentiful right in the vicinity of camp, we also go into adjacent Lake Clark National Park for added variety. At every turn, we explore the area in the careful company of our Expedition Leaders, seasoned bear naturalists who offer thorough coaching in respectful "bear etiquette" to ensure your safety. Our low-impact presence ensures that we never disturb the bears, and they in turn grant us comfortable access to watch them go about their daily routines.

Day 5: Bear Viewing / Private Flight to Homer

Enjoy one last morning to marvel at the bears in Lake Clark National Park, admiring their majesty and whimsy alike. Few travelers ever have such an encounter with solitude and wilderness on the scale that surrounds us here. The size of the landscape, the raw beauty, the profound silence—these things alone would make for a life-transforming experience. But the chance to watch Alaskan brown bears, these incomparable icons of the wild, on their turf, their terms...it's a wonder to have bears welcome us into their world. And one thing is certain: no one leaves here unmoved by the bears' plight, intensely aware of the threats from mining, climate change and other potential impacts to the health of this vital ecosystem on which the bears rely. We depart as ambassadors for the bears, our time among them leaving an indelible mark on us, inspiring us to do all we can to protect them.

If the weather cooperates, we plan to depart Bear Camp for Homer after lunch. Boarding our bush plane, we taxi down the beach, looking for a last glimpse of bears on the shoreline as we go. Back in Homer, we transfer to our hotel at the very end of the Homer Spit, edging the beach with broad views of Kachemak Bay and the Kenai Mountains beyond. There may be time to wander around the spit, lined with shops and galleries featuring Alaskan art and handicrafts. Later this evening, celebrate our adventures at a farewell dinner.

Day 6: Homer / Depart

Our Bear Camp adventure comes to a close today as we transfer to the airport for homeward flights.

Nat Hab's Alaska Bear Camp Accommodations

A Total Immersion with Brown Bears from Our Private Fly-In Wilderness Base

Nat Hab's Alaska Bear Camp

Nat Hab's fly-in camp, on a private inholding in Lake Clark National Park, is a sustainable base for exploring pristine brown bear habitat, providing remote wilderness accommodations that are low on impact yet high on comfort.

Land's End Resort

At the end of the road on the Kenai Peninsula, on the tip of the famous Homer Spit, our beachfront rooms have expansive views of Kachemak Bay and the Kenai Mountains.

What Makes Our Bear Camp Adventure Stand Out?

If you're coming to Alaska to see bears, you have options. Numerous outfitters offer bear viewing experiences, from a one-day excursion lasting a few hours to multi-day backcountry adventures like ours. Yet they aren't all alike. If seeing bears in the wilds of Alaska is likely to be a once-in-a-lifetime event for you, **Nat Hab's Alaska Bear Camp** offers some compelling advantages. Take a look:

1

Stay in the Very Midst of Premier Brown Bear Habitat

Lake Clark National Park is renowned for its brown bear encounters. Our fly-in camp is surrounded by some of Alaska's best bear habitat, and bears are often on view directly from camp as well on the shoreline and in the surrounding meadows. You won't find a better setting for bear watching!

2

Unparalleled Privacy & Seclusion from Our Fly-In Wilderness Camp

Nat Hab's Alaska Bear Camp sits on a private 15-acre inholding within Lake Clark National Park, which we access via chartered small plane from Homer. Because we're on private land, and the camp is ours alone, you'll enjoy secluded accommodations away from other travelers in the national park.

3

Exceptional Comfort in a Truly Remote Setting

Bear Camp is out there—way out there. But our isolated wilderness setting doesn't mean you'll lack for creature comforts. Heavy-duty weatherproof tent cabins are spacious, heated and furnished with real beds, a desk and a nighttime en suite potty, while the shared bathhouse has ecological composting toilets and hot showers. Meals are a highlight, created by our resident chef who makes the most of fresh local seafood and other regional fare.

4

A Scenic Roundtrip Flight is a Special Bonus

Many visitors to Alaska add a flightseeing trip to their itinerary, since there's nothing that tops an aerial view when it comes to appreciating the scale and grandeur of the Alaskan landscape. Such an adventure is part of getting to Bear Camp! We charter small planes out of Homer, crossing Cook Inlet and passing the snow-covered volcanoes of Redoubt and Iliamna, where the Aleutian Range meets the glaciated Alaska Range, before landing on the beach in front of camp.

5

Varied Bear Viewing Modes & Locations

From our base at camp, we watch bears from a private two-story viewing platform. And we often see bears on the beach right in front of camp! We also observe on foot with our naturalist guides, and from our private Bear Mobile, a rugged vehicle that takes us farther afield in search of bears. Its open sides and rear offer unimpeded viewing, and it is also equipped with weatherproof flaps that we can drop in case of inclement weather. While we enjoy total privacy at our **Bear Camp** location, we also have direct access into Lake Clark National Park for additional bear-viewing excursions.

6

Expert Bear Naturalist Guides Add Immeasurably to Your Experience

Our Bear Camp Expedition Leaders are not only professional naturalists, they're bear experts. They have spent years observing and learning about *Ursus arctos*, and their wealth of knowledge adds immeasurably to your experience. They are also seasoned guides when it comes to understanding bear behavior and your safety, coaching us in proper etiquette for respectful viewing. **See Expedition Leader bios with traveler comments** regarding the quality of our leaders.

7

Our Quality-Value Guarantee

With Natural Habitat Adventures, you receive our exclusive guarantee, stating clearly that we will meet the lofty expectations we set forth in our promotional materials. We think this is the most ambitious guarantee made by any adventure travel company..

8

Feel Good About Your Carbon-Neutral Journey

We care deeply about our planet, as we know you do. When you travel with us, the carbon emissions from your trip are 100% offset—including your round-trip flights from home. Natural Habitat Adventures has been the world's first carbon-neutral travel company since 2007.

9

Natural Habitat Adventures is WWF's Travel Partner

Because of our commitment to environmentally friendly travel, as well as the exceptional quality of our adventures, World Wildlife Fund—the world's leading environmental conservation organization—has named Natural Habitat Adventures as its worldwide travel partner, a designation that makes us exceedingly proud!

Make It Private

Travel privately, exclusively with your immediate family, multi-generational family or group of friends. And when you choose a private departure, you're assured the most exclusive and authentic *Nat Hab's Alaska Bear Camp* adventure on offer. Request your private departure by completing the form below.

Please note that on Alaska Bear Camp Make It Private departures we require a minimum group size of 7 travelers.

Also, please be aware that your per-person cost on a Make It Private trip will vary depending on the number of travelers in your group and may be as much as 10%-30% higher (ship-based trips may be even higher) than our normal trip cost unless you fill the trip.

This **Make It Private** option is available on nearly every Nat Hab trip for family and friend groups. Call an Adventure Specialist at 800-543-8917 or look for the "Make It Private" icon in the **pricing section** of a trip online at nathab.com to see prices based on your specific group size.

- **Internal air cost includes:** Chartered flights from Anchorage to Homer as well as chartered bush flights between Homer and Bear Camp (this will be listed separately on our invoicing).

Not Included

Travel to and from the start and end point of your trip, alcoholic beverages, some gratuities, passport and visa fees (if any), optional activities, items of a personal nature (phone calls, laundry and internet, etc.), airline baggage fees, airport and departure taxes (if any), required medical evacuation insurance, optional travel protection insurance.

Physical Requirements

Easy to Moderate

Nat Hab's Alaska Bear Camp adventure is a remote wilderness experience in the heart of wild brown bear habitat. Our deluxe safari-style camp is accessed exclusively via privately chartered small planes, which make beach landings as weather and tides permit. Good health and overall fitness are a must, as we are far from medical facilities in this roadless region—it may take several hours or potentially a full day or more to evacuate to a medical facility should health problems arise.

General mobility, including the ability to climb into and out of small planes, is essential. Trip participants must be able to walk at least 1 mile without assistance to join this adventure. Most of our time is spent standing out in the elements viewing bears for hours at a time, both from viewing platforms and on guided walks. Once we reach our bear-viewing site for each outing, we may spend several hours in essentially one spot with little movement. The closest bear viewing platform is 300 feet from camp, while the farthest is a 1.5 mile walk one way, but we do have vehicle support to facilitate getting to the more distant platforms if necessary. Bear viewing can also be done right from camp, but to get the full experience, guests must be able to walk at least 1 mile unassisted. While it isn't possible to take longer walks or hikes during our time at camp, our bear-viewing location may vary each day, and we access the sites by walking on wooden boardwalks, dirt paths or uneven natural terrain, which may include sections of shallow water. You must be able to carry all your own gear, including daypacks and camera equipment. We stress that travelers are not required to participate in every activity, but all guests must be in general good health. Guests must also come prepared with a positive attitude and the ability to be flexible in a wild and remote setting where weather conditions are highly changeable.

Important Information About This Trip

Our Bear Camp adventure offers a rare opportunity for an immersive encounter with one of the world's bear viewing locations, while luxury camping allows guests to stay in complete comfort. Since this trip takes place way off the grid and a 45-minute flight from the nearest town, guests must be prepared for all the vagaries that come with travel to such an isolated destination. These include inclement weather and limited operational materials, all of which makes a journey to our exclusive Alaska Bear Camp an adventure in the truest sense. At times, flights may be canceled or delayed due to poor weather, and some amenities may become unavailable until a new shipment arrives. But the adventure is part of the excitement, and we will use our decades of operating experience in Alaska to make the best of even substantial itinerary changes, should they occur.

Please understand that the hearty and tasty meals at camp are specially planned and prepared for well in advance. Dietary requirements due to serious medical conditions or strict personal restrictions can be met, with ample notice, but must be adhered to during the trip. If you have a very restricted diet, we recommend bringing some of your preferred snacks along, with the appreciation that certain foods are limited in this remote part of the world and there might not be many options.

Getting There & Getting Home

Arrive into **Anchorage**, Alaska by 1 pm on Day 1 of the trip to check in at 2pm for our group charter flight to Homer, departing at 3 pm.

Depart from **Homer**, Alaska at any time on the final day.
